Excerpt: . . . B-257739 so. In one study, for example, patient care as expressed in living wills was 23 percent of the time. A variety of factors affects whether an advance directive actually controls end-of-life care decisions, including the availability or specificity of a living will, family wishes, physicians attitudes, and legal issues. Although advance directives may be effective in designating proxy decisionmakers, there is evidence that health care agents may not accurately express the patients wishes. Furthermore, some patients may want their physicians or agents to override their advance directives in some cases or at least interpret them with broad discretion. Experts agree that the effectiveness of an advance directive is contingent upon the patients discussions of end-of-life treatment preferences with those who may need to make such medical decisions, be they providers or health care agents. Better communication with patients may help physicians in interpreting living wills and improve the accuracy of proxy assessment of patient treatment wishes. The patients advance directive may not be followed simply because...

Reviews

The most effective publication i at any time go through. This is certainly for all those who statte that there had not been a worthy of looking at. Its been printed in an extremely straightforward way which is merely soon after i finished reading this publication where basically changed me, change the way in my opinion.
