The Span of Gestation and the Cause of Birth: A Study of the Critical Period and Its Effects in Mammalia (Classic Reprint)

By John Beard

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Span of Gestation and the Cause of Birth: A Study of the Critical Period and Its Effects in Mammalia In the following pages a solution of the problem of the length of gestation in Mammalia land Man is essayed for the first time from the embryological standpoint. The question has often enough been examined by physiologists and gynecologists, but, if Harvey s attempts at its explanation be excepted, it has never yet received consideration as a problem of embryology. None the less, there can be no question, that all pertaining to the development of the embryo forms part of the science of embryology, unless this word mean but the study of the coming-into-being of the parts of the embryo, and not of the whole organism. Embryology, as usually understood, concerns itself at the present day almost exclusively with questions included under the former definition, and, unfortunate though it be, a science of the embryology of organisms hardly exists. Yet no subject could be more interesting in its study, none more promising of results. The...
