

Ice and Refrigeration Volume 20

By Southern Ice Exchange

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1901 Excerpt: .charged with lime. The water gradually rises, and the sediment remains at the bottom. We are able to get rid of it in that way. We are not able to get rid of the sulphate. We had to try soda ash, as a carbonate of soda, mixed with the water. We keep up the same processes yet, and treat the water in this manner. I have to say the cost is something like three-quarters of a cent per 1,000 gallons; that does not include the cost of pumping. I think that about covers the cost of the process. All there was to it was the putting up the tanks, and the fixing generally for the handling of the lime. We had three separate plants. We have only two now. The lime is pumped from a central place. It has kept the water reasonably clean, and we...
